

1 Limits:

When $d > 20\text{cm}$, the EUT should mark the recommend use distance for EUT external antenna and the $\text{MPE} = 1\text{mW}/\text{cm}^2$.

2: EUT RF Exposure

$$\text{MPE} = \text{PG} / 4\pi R^2 \quad (R: 20\text{cm})$$

Frequency(M Hz)	Peak output power(dBm)	Output power(mW)	Antenna Gain(dBi)	Antenna Gain(Linear)	MPE
2405	11.374	13.721	-1.3	0.741	0.00202
2440	11.068	12.788	-1.3	0.741	0.00189
2476	11.265	13.381	-1.3	0.741	0.00197
